WILDERNESS NEIGHBORHOOD TRAFFIC CALMING PROJECT

Traffic Calming in Your Neighborhood

Thurston County recently completed a speed study, and your neighborhood has been selected for traffic calming improvements. We considered several factors:

- The unique layout of roads within the Wilderness neighborhood
- Improvement costs and available funding
- Road conditions like hills, curves, and driveways

Speed humps were chosen because they are affordable and provide the most benefit for the neighborhood. We often hear questions about the wheel paths or gaps in the speed humps—these wheel paths are required for emergency vehicles.

Your input is important! Please send your feedback to Sam Bloom, sam.bloom@co.thurston.wa.us. We will address all responses at the Wilderness Property Owners Association meeting on November 19, 2024.
